SUBJECT INDEX

Accelerator mass spectrometry
Biomedical accelerator mass spectrometry 247
Radiocarbon analysis by accelerator mass spectrometry 235
AKD
SIMS imaging of paper surfaces. Part 4. The detection of desizing agents on hard-to size paper surfaces 177
Alamethicin
Structural measurements on several alamethicin peptides by the time-of-flight correlation technique 65
All elements
SIMS quantification in Si, GaAs, and diamond – an update 43
L-Arginine
Imaging ion and molecular transport at subcellular resolution by secondary ion mass spectrometry 161
ASA
SIMS imaging of paper surfaces. Part 4. The detection of desizing agents on hard-to size paper surfaces 177

Basal lamina
Scanning ion images; analysis of pharmaceutical drugs at organelle levels 147
Biologic matrix
Secondary ion emission and images from a biologic matrix 131
Biomedical applications
Biomedical accelerator mass spectrometry 247
BNCT
Imaging ion and molecular transport at subcellular resolution by secondary ion mass spectrometry 161

Calcium imaging
Imaging ion and molecular transport at subcellular resolution by secondary ion mass spectrometry 161
Cationization
Ion microscope and ion microprobe analysis under oxygen, cesium and gallium bombardment 51
Clusters
Stone-age mass spectrometry: the beginnings of "SIMS" at RCA Laboratories, Princeton 1
Cosmogenic isotopes
Radiocarbon analysis by accelerator mass spectrometry 235
Cryogenic techniques
Scanning ion images; analysis of pharmaceutical drugs at organelle levels 147

Depth profiles
On the SIMS depth profiling analysis: reduction of matrix effect 11
Depth profiling
Recent successes in the use of secondary ion mass spectrometry in microelectronics materials and processing 29
Diamond
SIMS quantification in Si, GaAs, and diamond – an update 43

Energy discrimination technique
On the SIMS depth profiling analysis: reduction of matrix effect 11

Femtosecond pulses
Ion beam induced desorption with postionization using high repetition femtosecond lasers 257
Flyash
In situ analysis of organic monolayers and their reactivity on single micrometer-sized particles by time-of-flight secondary ion mass spectrometry 87

GaAs
SIMS quantification in Si, GaAs, and diamond – an update 43

Gold
Isotope ratio and trace element imaging of pyrite grains in gold ores 213

High resolution chemical imaging
High-resolution chemical imaging with scanning ion probe SIMS 191
Historical perspective
Stone-age mass spectrometry: the beginnings of "SIMS" at RCA Laboratories, Princeton 1

Imaging
Ion beam induced desorption with postionization using high repetition femtosecond lasers 257
Isotope ratio and trace element imaging of pyrite grains in gold ores 213
Interfaces
On the SIMS depth profiling analysis: reduction of matrix effect 11
Ion microprobe
Ion microscope and ion microprobe analysis under oxygen, cesium and gallium bombardment 51
Ion microscope
Ion microscope and ion microprobe analysis under oxygen, cesium and gallium bombardment 51
Ion microscopy
Imaging ion and molecular transport at subcellular resolution by secondary ion mass spectrometry 161
Ionization
Ion beam induced desorption with postionization using high repetition femtosecond lasers 257
Isotope ratio
Isotope ratio and trace element imaging of pyrite grains in gold ores 213

Kidney
Scanning ion images; analysis of pharmaceutical drugs at organelle levels 147

MA^+ technique
On the SIMS depth profiling analysis: reduction of matrix effect 11
Mass spectrometry
Structural measurements on several alamethicin peptides by the time-of-flight correlation technique 65
Matrix effect
On the SIMS depth profiling analysis: reduction of matrix effect 11
Metastable decay
Structural measurements on several alamethicin peptides by the time-of-flight correlation technique 65
Microanalysis
Secondary neutral mass spectrometry (SNMS)–recent methodical progress and applications to fundamental studies in particle/surface interaction 271
Microelectronics
Recent successes in the use of secondary ion mass spectrometry in microelectronics materials and processing 29
Molecular dynamics
A microscopic view of particle bombardment of organic films 225
Molecular fragmentation
Ion beam induced desorption with postionization using high repetition femtosecond lasers 257

Organic overlayers
A microscopic view of particle bombardment of organic films 225

Paper surfaces
SIMS imaging of paper surfaces. Part 4. The detection of desizing agents on hard-to size paper surfaces 177
Particle bombardment
A microscopic view of particle bombardment of organic films 225
Particles
In situ analysis of organic monolayers and their reactivity on single micrometer-sized particles by time-of-flight secondary ion mass spectrometry 87
Peptide sequencing
Structural measurements on several alamethicin peptides by the time-of-flight correlation technique 65
Photolysis
In situ analysis of organic monolayers and their reactivity on single micrometer-sized particles by time-of-flight secondary ion mass spectrometry 87
Pitch
SIMS imaging of paper surfaces. Part 4. The detection of desizing agents on hard-to-size paper surfaces 177
Polycyclic organic matter
In situ analysis of organic monolayers and their reactivity on single micrometer-sized particles by time-of-flight secondary ion mass spectrometry 87
Polyisobutylenes
Studies of polyisobutylene using time-of-flight secondary ion mass spectrometry (TOF-SIMS) 113
Polymer structure
Studies of polyisobutylene using time-of-flight secondary ion mass spectrometry (TOF-SIMS) 113
Polymers
Studies of polyisobutylene using time-of-flight secondary ion mass spectrometry (TOF-SIMS) 113

Pyrite
Isotope ratio and trace element imaging of pyrite grains in gold ores 213

Quantitative surface and thin film analysis
Secondary neutral mass spectrometry (SNMS)–recent methodical progress and applications to fundamental studies in particle/surface interaction 271

Radiocarbon analysis
Radiocarbon analysis by accelerator mass spectrometry 235
Reduction of matrix effect
On the SIMS depth profiling analysis: reduction of matrix effect 11
Relative sensitivity factors
SIMS quantification in Si, GaAs, and diamond – an update 43

Scanning ion microprobes
High-resolution chemical imaging with scanning ion probe SIMS 191
Secondary ion emission
Secondary ion emission and images from a biologic matrix 131
Selenium
Scanning ion images; analysis of pharmaceutical drugs at organelle levels 147
SEM
Imaging ion and molecular transport at subcellular resolution by secondary ion mass spectrometry 161
Semiconductor
Recent successes in the use of secondary ion mass spectrometry in microelectronics materials and processing 29
Si
SIMS quantification in Si, GaAs, and diamond – an update 43
SIMS microprobe
Scanning ion images; analysis of pharmaceutical drugs at organelle levels 147
SIMS
High-resolution chemical imaging with scanning ion probe SIMS 191
Imaging ion and molecular transport at subcellular resolution by secondary ion mass spectrometry 161
Ion beam induced desorption with postionization using high repetition femtosecond lasers 257
Ion microscope and ion microprobe analysis under oxygen, cesium and gallium bombardment 51
Isotope ratio and trace element imaging of pyrite grains in gold ores 213
On the SIMS depth profiling analysis: reduction of matrix effect 11
Recent successes in the use of secondary ion mass spectrometry in microelectronics materials and processing 29
Small-area depth profiling in a quadrupole based SIMS instrument 19
Studies of polyisobutylene using time-of-flight secondary ion mass spectrometry (TOF-SIMS) 113
Single-crystal sputtering
Secondary neutral mass spectrometry (SNMS)–recent methodical progress and applications to fundamental studies in particle/surface interaction 271
Sizing
SIMS imaging of paper surfaces. Part 4. The detection of desizing agents on hard-to size paper surfaces 177
Small-area depth profiling
Small-area depth profiling in a quadrupole based SIMS instrument 19
Spectrometer design
Stone-age mass spectrometry: the beginnings of "SIMS" at RCA Laboratories, Princeton 1
Sputter generated molecules
Secondary neutral mass spectrometry (SNMS)–recent methodical progress and applications to fundamental studies in particle/surface interaction 271
Sputtering
A microscopic view of particle bombardment of organic films 225
Stone-age mass spectrometry: the beginnings of "SIMS" at RCA Laboratories, Princeton 1
Stable isotopes
Imaging ion and molecular transport at subcellular resolution by secondary ion mass spectrometry 161
Surface analysis
Recent successes in the use of secondary ion mass spectrometry in microelectronics materials and processing 29

Time of flight
Structural measurements on several alamethicin peptides by the time-of-flight correlation technique 65
Time-of-flight secondary ion mass spectrometry
In situ analysis of organic monolayers and their reactivity on single micrometer-sized particles by time-of-flight secondary ion mass spectrometry 87
TOF-SIMS
SIMS imaging of paper surfaces 177

Trace element
Isotope ratio and trace element imaging of pyrite grains in gold ores 213
Trace impurities
Stone-age mass spectrometry: the beginnings of "SIMS" at RCA Laboratories, Princeton 1
Useful yield
Ion microscope and ion microprobe analysis under oxygen, cesium and gallium bombardment 51
